and 30 Yearling Commercial Heifers*

# SALE INFORMATION

## AUCTIONEER

Seth Weishaar  
Belle Fourche, SD  
(605) 210-1124

## SALE CONSULTANT

Vern Frey  
Frey Livestock Sales & Services, Inc.  
(701) 721-0344

## SPECIAL REPRESENTATIVES

Dan Piroutek, Tristate Livestock News, Milesville, SD • (605) 544-3316  
Dustin Carter, Livestock Plus • (712) 898-9972  
Jeff Kapperman, Tristate Neighbor • (605) 940-5104

## SALE DAY PHONE

David's Cell: (605) 940-9771  
Justin's Cell: (605) 929-4021  
Brian's Cell: (605) 770-4426  
Damon's Cell: (612) 618-8577

## SALE LOCATION

1100 North Main, Tripp, South Dakota 57376  
at David & Candyce's Farm – at the Hwy 37 & Hwy 18 Junction, 1 1/4 mile east on Hwy 18 and 1/2 south  
*(We would be happy to assist with accommodations if you'll be spending the night. Please call us in advance to make your plans)*

## HERD HEALTH

*Mogck Angus Farms has a stringent herd health program and this past fall every cow tested negative for BVD Type 1 and Fecal PCR Johnes. We also execute a comprehensive calfhood vaccination program throughout the season. All bulls will be semen tested prior to delivery.*

## TERMS & CONDITIONS

*Cattle sell under the suggested terms & conditions of the American Angus Association guidelines.*

## FREE DELIVERY

*Free delivery within 300 miles or central points. \$100 discount if picked up within a week of sale.*

## LIABILITIES

*All persons who attend the sale, do so at their own risk. The seller assumes no responsibility for any accident that may occur.*

## BREEDER'S GUARANTEE

*Mogck Angus Farms guarantees all bulls selling for \$4,000 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull(s). If a replacement bull is available, he will be provided, or if a buyer prefers, credit towards one bull will be given in the following year's sale, less salvage value of the injured bull. \*Death of the bull is not covered by this guarantee and we recommend the purchase of livestock mortality insurance to cover this type of loss.*

## INSURANCE

*For bull mortality or loss of use, an insurance representative will be available sale day through the Martin Trudeau Agency (605) 770-5170*

## CUSTOMER LOYALTY DISCOUNT

*A 2% discount will be offered off the total purchase to customers that have purchased a bull in either of our previous two sales. Call or email for more details.*

## REFERRAL CREDIT

*A 5% credit will be given to any customer that refers a new buyer that purchases a bull in this year's sale. Please have that buyer give us your name when picking up their buyer number or by calling us in advance. The credit can be used at this or any future sales. The referral credit and loyalty discount cannot be combined.*

## SELLING

*70 Yearling Registered Angus Bulls & 30 Yearling Commercial Heifers*

## COMPLIMENTARY LUNCH

*Join us for a free beef lunch served from 11:00 to 1:00 sale day.*

## STORM DATE

*To be announced on radio stations KMIT 105.9 FM & KOOL 98.3 FM*

## REVENUE SHARING

*Mogck Angus will retain an interest in selected lots which will be announced sale day. Should the bull be leased for semen sales, Mogck Angus revenue share will be pro-rated accordingly.*

## ANNOUNCEMENTS

*Announcements made from the auction block on sale day will take precedence over printed material or any form of advertisement.*

## WEBSITE

*www.mogckangusfarms.com • Pictures are posted of some of the bulls including links to updated EPD's at the American Angus Association*

# Welcome

## Welcome to Mogck Angus Farms 27<sup>th</sup> Annual Production Sale!

### *Fellow Cattlemen & Cattlewomen,*

*Our 2015 sale will mark our 27th year holding an annual production sale and 82 years in the Angus business. Four generations of building a sustainable herd; of improving the quality in our cattle through progressive practices and genetics; of never settling for average or status quo because we believe that you need to work as hard as the customers you serve and four generations of family that offers you Angus bulls & females that are modern and balanced, focusing on sound and structurally correct cattle. We believe this equates to longevity in the product we offer which will add value and profitability to those that invest with us.*

*We are very proud to be holding this year's sale at our farm in Tripp. It'll mark the first time that our family has had the privilege of hosting this event at home and we invite you to make this a truly special occasion by attending. If you're unable to attend in person, our sale will also be available on DVAuction; be sure to go to [www.dvauction.com](http://www.dvauction.com) ahead of time to view videos of all of our sale bulls. We will be selling 70 bulls and 30 heifers that originate from our very best cow families using sires that represent our focus on balanced numbers with plenty of growth and excellent phenotype and docility.*

*Just as we did last year, Mogck Angus Farms will be offering its customers either a loyalty discount or a referral credit. It's one way we can show our appreciation and loyalty to you for doing the same over the last 3 decades. Based on the very positive feedback we received in our customer survey, we'd ask that you share the experiences you've had with us to others. For all of you visiting and buying for the first time, let us prove to you that our cattle will take your program to the next level. We strive to make you lifelong customers of Mogck Angus Farms.*

Sincerely,

*David Mogck*

**Sire of Lots 1-13**

- The calving ease specialist!
- No other bull delivers extreme calving ease genetics in such a desirable package.
- Confidence continues to amaze breeders with the amount of substance, muscle shape and structural correctness he sires for such an easy calving bull.
- Progeny have been and will be sale features around the country - 19 sons averaged \$14,750 at Connealy's 2013 bull sale.

Watch & bid online for FREE at

**DVAuction**  
Broadcasting Real-Time Auctions

Can't make the sale? Bid from home with DVAuction's "real-time" internet bidding service!

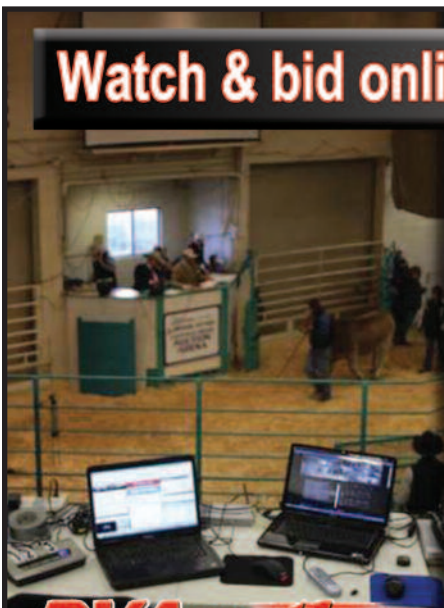

Buying online is as easy as 1, 2, 3...

1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

**Proxy Bidding**-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

**Having troubles?** During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

- Tiger Power has a unique outcross pedigree to many of today's popular genetics.
- Tiger Power is an easy fleshing bull that has freedom of movement on a sound structure with excellent flex to his pastern and joints. He is big footed with plenty of base width and excellent muscle shape down his quarter and stifle. Tiger Power has a quiet demeanor, which translates to his calves a super disposition.
- Tiger Power hails from one of the greatest and most proven cow families in Canada.

**Sire of Lots 41-45**

- Capitalist will add muscle and base width like no other; Truly 3 dimensional
- Siring calving ease with lots of stoutness and power
- Jerry Connealy stated Capitalist calves are one of his best sire groups and will definitely be used heavily again
- One of the most highly sought after bulls in the Angus breed

### Sire of Lots 51-52

- First Impression is the exciting Brilliance son out of First Class' dam. He was named Grand Champion Angus bull at the 2011 North American and the 2012 National Western Stock Show. His first progeny exhibited at the 2012 North American respectively won their classes and divisions. You probably know the First Class progeny are dominating the show ring with outstanding profile and presence, and that First Class semen is rare, so try First Impression to inject exciting genetics! \$30

2015 National Western Stock Show

**BIRTH WEIGHTS**

Every calf born at Mogek Angus Farms is weighed with a scale. That is the weight reported on AHIR and in the performance information listed in this sale book.

Many breeders, however, use an estimated birth weight either by sight or by taping the calf's heart girth and than using a chart to convert the measurement to pounds. Studies have shown that the tape is very inaccurate and eliminates heavy calves over 90 pounds. All we ask is that you compare apples to apples.

If you are comparing these bulls to bulls from a herd that uses estimated tape weights, you need to know that the same calf will "weigh" differently in each herd.

Using CED and BW epd's is a much better indicator of what is in the calf genetically. Studies have shown epd's to be as much as nine times more accurate than ratios or raw weights as a selection tool.

# EPD and \$Value Definitions

**EXPECTED PROGENY DIFFERENCE (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

EPDs are enhanced by genomic results generated by:

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

**\$Value Indexes**, are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

## **PRODUCTION EPDs**

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

## **\$VALUE INDEXES**

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment. [More Info](#)

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
