Located 1/2 mile north of Tripp

*Selling 76 Registered Yearling Angus Bulls*

# SALE INFORMATION

## AUCTIONEER

Seth Weishaar  
Belle Fourche, SD  
(605) 210-1124

## SPECIAL REPRESENTATIVES

Donnie Leddy, Cattle Business Weekly, Stockholm, SD: (605) 695-0113  
Rod Geppert, Angus Journal: (605) 295-3673  
Jeff Kapperman, Tristate Neighbor: (605) 940-5104  
Dan Piroutek, Tristate Livestock News, Milesville, SD: 605-544-3316

## SALE DAY PHONE

David's Cell: (605) 940-9771                      Justin's Cell: (605) 929-4021  
Brian's Cell: (605) 770-4426                      Damon's Cell: (612) 618-8577

## SALE LOCATION

1100 North Main, Tripp, South Dakota 57376  
at David & Candyce's Farm – at the Hwy 37 & Hwy 18 Junction, 1 1/4 mile east on Hwy 18 and 1/2 south (We would be happy to assist with accommodations if you'll be spending the night. Please call us in advance to make your plans)

## SELLING

76 Yearling Registered Angus Bulls

## HERD HEALTH

All bulls will be semen tested and tested negative for BVD prior to delivery. We also execute a comprehensive calffood vaccination program throughout the season.

## TERMS & CONDITIONS

Cattle sell under the suggested terms & conditions of the American Angus Association guidelines.

## FREE DELIVERY

Free delivery within 300 miles or central points. \$100 discount if picked up within a week of sale.

## BREEDER'S GUARANTEE

Mogck Angus Farms guarantees all bulls selling for \$3,000 or more against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bull(s). If a replacement bull is available, he will be provided, or if a buyer prefers, credit towards one bull will be given in the following year's sale, less salvage value of the injured bull. \*Death of the bull is not covered by this guarantee and we recommend the purchase of livestock mortality insurance to cover this type of loss.

## INSURANCE

For bull mortality or loss of use, an insurance representative will be available sale day through the Martin Trudeau Agency (605) 770-5170

## REVENUE SHARING

Mogck Angus will retain an interest in selected lots which will be announced sale day. Should the bull be leased for semen sales, Mogck Angus revenue share will be pro-rated accordingly.

## CUSTOMER LOYALTY DISCOUNT

A 2% discount will be offered off the total purchase to customers that have purchased a bull in either of our previous two sales. Call or email for more details.

## COMPLIMENTARY LUNCH

Join us for a free beef lunch served from 11:00 to 1:00 sale day.

## STORM DATE

To be announced on radio stations KMIT 105.9 FM & KOOL 98.3 FM

## ANNOUNCEMENTS

Announcements made from the auction block on sale day will take precedence over printed material or any form of advertisement.

## WEBSITE

[www.mogckangusfarms.com](http://www.mogckangusfarms.com) • Pictures are posted of some of the bulls including links to updated EPDs at the American Angus Association

## LIABILITIES

All persons who attend the sale, do so at their own risk. The seller assumes no responsibility for any accident that may occur.

# Welcome

## Welcome everyone!

The entire family here at Mogck Angus Farms welcomes you to our 28th annual production sale! We believe the future of the beef business continues to look bright with solid pros in most segments of the cattle industry combined with lower feed costs. Excellent moisture throughout most of the region is creating optimism for a rock solid 2016.

The Angus breed is the greatest for many reasons, but I feel there are two in particular. First, no other breed in the industry has the leaders and visionaries that work tirelessly to develop new ideas using the latest technology as the men and women involved with the American Angus Association. Second, the Angus cow is truly the leader among all beef breeds from the standpoint of production. No other cow crosses as well with all other breeds with the consistency as the superior Angus female.

We are humbled and excited to have bred and raised MAF Tanker. Tanker is taking the breed by storm with his unmatched performance and numbers that continue to climb with more calf weights and data processed. The American Angus Association tracks this data and currently Tanker is the #1 bull in the Angus breed when combining the EPDs of weaning weight, yearling weight, \$W, \$F and CED, according to the latest young sire supplement. We have 14 Tanker sons headlining this year's sale and each of them will offer unmatched growth compared to any Angus genetics currently available.

Mogck Angus Farms has several loyal customers that have been with us for 15 years plus, using strictly our bulls and maintaining a commercial Angus herd by keeping replacement heifers back each year. The quality and uniformity is evident when they sell calves or fats at market. This is proof that profitability can be maximized using our genetics year over year. We are especially thankful to those who have bought into our herd and program.

This year's offering is by far the best we've ever had with many embryo transplants, along with several outcross bloodlines that combine moderate birth weights with explosive growth. As always, we strive to provide a product that combines good feet and longevity in a package that is also very pleasing to the eye. Finally, please take notice of our Reserve Division Champion pen of 3 bulls from the National Western Stock Show. They are a remarkable trio and prime example of the quality and depth you will find in this year's set of bulls.

Stop by anytime prior to March 10th to view the bulls and ask questions. We hope you're able to join us on sale day!

Sincerely,  
*David Mogck*

**THE #1 ANGUS BULL FOR \$W** and our high selling bull from 2013, purchased by my cousin, Charles Mogck, and currently leased by Select Sires. Tanker has outperformed all other sires in pounds added from birth to weaning and then to yearling. He's the #4 Angus bull for WW, is in the top 1% for YW, top 3% Docility, top 4% Heifer Pregnancy and is in the top 1% for \$F & \$W. Combine that with calving ease (+11 CED) and you are looking at a bull with one of the widest spreads in the Angus breed. We have 14 outstanding sons of Tanker to choose from that will add more pounds to your calves in less time.

Cash took the 2012 spring bull sale season by storm when he sold 1/3 interest for \$108,000, making Cash the highest selling bull ever produced in the productive Barstow Angus program. Cash is a sensibly-sized bull that is massive in his design with incredible body volume and shape, thickness, and muscle mass throughout.

B M EILEEN 2114 AAA 17216655  
DAM {B M EILEEN 293

- Resolution was our high selling bull in 2014, purchased by Poss Angus of Nebraska. He was also our lead bull in the pen of 3 we took to the 2014 National Western in Denver.
- Resolution is a Connealy Final Solution son out of a Dash daughter. He ranks in the top 1% for the Angus breed for \$W, top 3% for WW, and top 5% for YW. His carcass numbers are very solid and this bull will not only add pounds quickly, but the product you hang on the rail will add dollars to your pocket.

# Watch & bid online for FREE at

# DVAuction

Broadcasting Real-Time Auctions

**Can't make the sale? Bid from home with DVAuction's "real-time" internet bidding service!**

**Buying online is as easy as 1, 2, 3...**

1. Create an account at [www.dvauction.com](http://www.dvauction.com) under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

**Proxy Bidding**-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

**Having troubles?** During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

- Process & Magnitude (Magnitude bulls are on pages 15 & 16) were selected by David from the Sydenstricker program to introduce fresh outcross genetics to our herd. They have exceeded our expectations by producing high quality, fast growing calves as well as proving to be sure shot calving ease bulls.
- Magnitude was the #1 gaining bull from weaning to yearling in his contemporary group at Sydenstrickers and his sons are fast gainers here at Mogck Angus Farms as well.

- Tiger Power has a unique outcross pedigree to many of today's popular genetics.
- Tiger Power is an easy fleshing bull that has freedom of movement on a sound structure with excellent flex to his pastern and joints. He is big footed with plenty of base width and excellent muscle shape down his quarter and stifle. Tiger Power has a quiet demeanor, which translates to his calves having a super disposition.
- Tiger Power hails from one of the greatest and most proven cow families in Canada.

## EPD and \$Value Definitions

**EXPECTED PROGENY DIFFERENCE (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

EPDs are enhanced by genomic results generated by:

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

**\$Value Indexes**, are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

### PRODUCTION EPDs

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

### \$VALUE INDEXES

\$Value indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment. [More Info](#)

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.
